**RE: IdenTrust Compliance Certification of SafeNet Products**

Dear Dave,

It is my pleasure to present this letter confirming that the following products developed by SafeNet has successfully completed the requirements for certification under the **IdenTrust<sup>SM</sup> Compliance Certification Program**. It supersedes the IdenTrust certification issuance on January 7, 2009.

The SafeNet products tested against the IdenTrust specifications are listed in the following table.

	IdenTrust Test Plan	IdenTrust Trust Network Version	Test Completion
<b>SafeNet</b> ✓ <b>iKey 2032i USB Token</b> ✓ <b>SC 330i Smart Card</b> ✓ <b>Borderless Security v. 7.1.1.0012</b>	IT-KSMTP v. 3.2	V3.1	30 April 2009

*Note: Borderless Security v 7.1.1.0012 was used for both iKey 2032i and SC 330i.*

The aforementioned products are certified by IdenTrust to be IdenTrust Compliant, and are authorized to use the "IdenTrust Compliant<sup>SM</sup>" brand mark and logo ("the Marks") pursuant to the conditions outlined in the *IdenTrust Compliant Partner Agreement* (the "Agreement") executed on 14 December 2007 and in the *IdenTrust Compliant Marks and Brand Usage Guidelines* ("IL-Compliant Marks"). Continued use of the Marks requires continued adherence to each of the terms of the Agreement, including payment of all fees due upon any renewal of the Agreement and upon any retesting of the product that may become necessary. Any party seeking confirmation of the current Certification status of any product certified by IdenTrust may be directed to my attention.

Sincerely,

Christy Serrato  
Director, Business Development  
IdenTrust, Inc.

George Ehigiator  
Certification Program Test Lead
